Abstract

This is a small simple example of what will be in the SCIENTIFIC DOCUMENT!!!!!!

1 Introduction

Does the introduction extend the title, given more background that can be put the work into the context?

Does the intrduction contain a general overview of the report and clearly explains the overall aim of the work and a comment about whether that aim was achieved?

2 Body

How does digital media development affect the growing changes in specific hardware developement.

Refrences style use bib style, most scientific documents will have a bib style refrence already in a bib document.

2.1 josh's question

- The "race" for inovative "game changing" technology to influence the rapidly changing landscape of digital media development has gave way to the development of hardware to specifically innovate the way we interact with digital media.

- What is digital media development
- What specific hardware is being developed for the purpose of digital media development
- What considerations were minded while developing these hardware and what specific negative reactions were found
- Justify why the relationship between digital media development and specific hardware is important in relation to your question
- description of relevant work in the field published in journals and conferences
- brief review of the key literature??? (course books or references?)
- relevant work included as examples
- link back to intro statement
- Whats the future of digital media development
- references
 - f
 - e
 - d
 - c
 - b
 - a

3 Conclusion
